

The Attic

Each player places the Attic card this side up (showing the 4 dice spaces) next to his/her Studio Board.

- * Each player may build only one Attic during a game.
- * On your turn, add any number of identical dice, from either your new die roll or from your storage space, or from a destroyed installation, to the inactive Attic card on your turn. Dice may not be taken off this card except to return ALL of them to the supply.

* When the Attic card has 4 dice with identical values, remove these dice and return them to your supply. Then build your Attic by flipping this card to this side and sliding it under your player board so the extra die storage space is visible immediately above your old storage space.

* You may use your Attic to store an additional die in your storage space immediately and for the remainder of the game.
