

Facts in Five

Rule Improvements

1 => To prevent a runaway leader, a round winner may not score more than **50 points** over the rounds second place players score, with excess points simply being discarded.

Note that this rule only affects round earnings, so the aggregate score between players currently in first and second place might exceed fifty points in difference.

2 => To increase excitement in the end game, all scores earned in the Final Round are DOUBLED, while the **50 point** round winner rule continues to remain in effect.
